

DEPARTMENT OF FORENSIC MEDICINE & TOXICOLOGY AIIMS BATHINDA

FORENSIC WORKSHOP

ON

EXAMINATION OF SURVIVOR IN A CASE OF SEXUAL OFFENSE

13th December ,2024

- This workshop is designed to train undergraduate students on how to collect biological, trace, and physical evidence, such as swabs and clothing, and conducting medico-legal examinations to document injuries and gather samples.
- It aims to provide hands-on experience with standardized protocols, evidence collection, and legal documentation, while emphasizing ethical principles like informed consent and confidentiality.
- By understanding national guidelines and the medico-legal significance, students can contribute to justice ensuring they are ready to fulfill their roles as compassionate and competent healthcare providers.
